

**A**

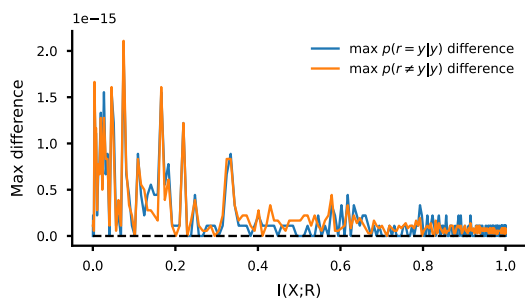

Bead-prediction task  
Heuristic (one-back) IB bound

**B**

Comparison of softmax initialization to random initialization for IB algorithm (<0 means random is worse)

**C**

Check of  $p(r=y|y)$  property that must be true for softmax solution to hold (traces must be 0)

**D**

Comparison of softmax solution to IB algorithm solution  
(0 means no difference)
