

A

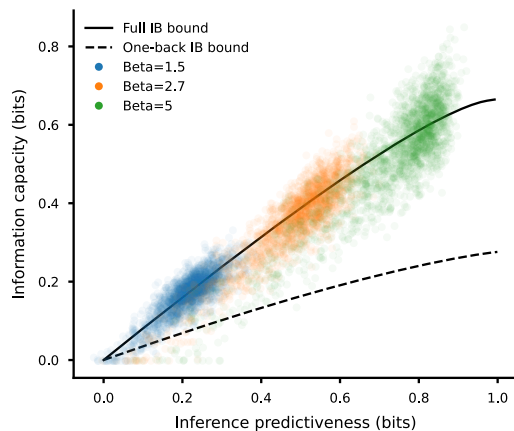

Bead prediction task
 Single trial set (500 bead draws)
 2000 choice set samples (fully optimal model)
Error from choice sampling

**C**

Horse prediction, intermediate W-S ratio (2.5:1)
 Single trial set (600 horse races)
 2000 choice set samples (fully optimal model)
Error from choice sampling

**B**

Bead prediction task
 2000 different trial sets (500 bead draws)
 1 choice set sample per trial set (fully optimal model)
Error from choice sampling + trial set sampling

**D**

Horse prediction, intermediate W-S ratio (2.5:1)
 Single trial set (600 horse races)
 2000 choice set samples (fully optimal model)
Error from choice sampling + trial set sampling
