

A

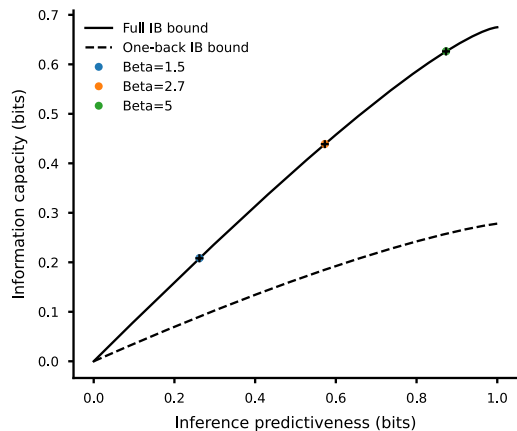

Bead prediction task
Single trial set (500 bead draws)
2000 choice set samples (fully optimal model)
NSB estimator

**B**

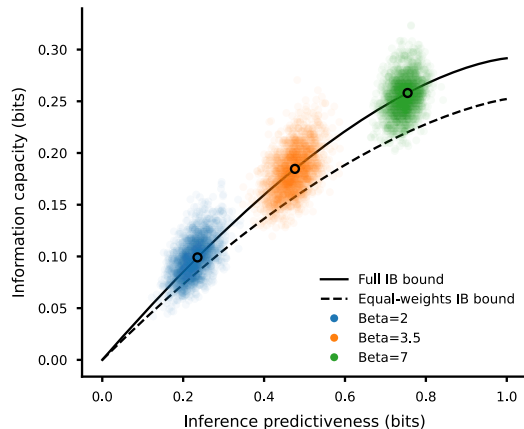

Bead prediction task
Single trial set (500 bead draws)
2000 choice set samples (fully optimal model)
No estimator

**C**

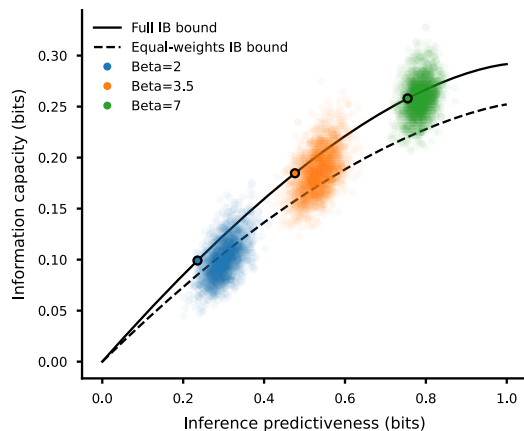

Bead prediction task
Single large N trial set (10000000 bead draws)
20 choice set samples (fully optimal model)
No estimator

**D**

Horse prediction, intermediate W-S ratio (2.5:1)
Single trial set (600 horse races)
2000 choice set samples (fully optimal model)
NSB estimator

**E**

Horse prediction, intermediate W-S ratio (2.5:1)
Single trial set (600 horse races)
2000 choice set samples (fully optimal model)
No estimator

**F**

Horse prediction, intermediate W-S ratio (2.5:1)
Single trial set (10000000 horse races)
20 choice set samples (fully optimal model)
No estimator
